

Intro to Health Science

Quarter 2 Project

Disease/ Disorder Project

You will research a disease or disorder that interests you and create either a poster or a brochure. You will need to find the etiology (cause of the disease), prevalence (how many people get it), susceptibility, signs and symptoms, treatment options, and prevention options. Then create either a brochure to inform others about this disease. It must be in color, neat, and attractive as well as informative.

Brochure: Use one of the pamphlet template options on the website.

Either Project will be graded on:

- Information
 - Name (common and medical if they are different)
 - Etiology (be sure to explain it so a Jr. High student could understand it)
 - Prevalence
 - Susceptibility
 - Signs and Symptoms
 - Treatment Options
 - Prevention
 - References (3 sources minimum)
- Neatness/ Looks
 - Easy to read
 - Use of space-Use every part of the template. No blank space
 - Organization
 - Art

****This project is worth 100 points. Any late projects, even if you are absent, will be docked 50%****

Your project is due: November 12
